

A Treatise on Spherical Trigonometry, by W.J. M Clelland and T. Preston

By William John M Clelland

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1885 Excerpt: .2 2 4. If α, β, γ be the arcs joining the middle points of the sides, prove $\cos \alpha \cos \beta \cos \gamma = 1 + \cos \alpha + \cos \beta + \cos \gamma = J - c = a b e = \sin S$; $\cos \alpha \cos \beta \cos \gamma = 4 \cos \alpha \cos \beta \cos \gamma = 2 \cos \alpha \cos \beta \cos \gamma$ and hence, if one of the arcs be a quadrant, the triangle whose sides are α, β, γ is quadrantal. (See Ex. 3.) 5. If the side e of a spherical triangle be a quadrant, and δ the arc drawn at right angles to it from the opposite vertex, show that $\cot^2 \delta = \cot^2 A + \cot^2 B$. (Science and Art Exam. Paper.) Let x be the foot of the perpendicular δ on the base AB ; therefore $\tan \delta = \tan A \cdot \sin AX = \tan B \cdot \cos AX$; therefore, c. 6. Given...
